Maestro (2.0)

- Currently in development
- Activity planner software for future Mars missions (MSL)
- Open-source: RoverWare

Maestro (cont.)

- Developed with common tools & technologies
 - Eclipse IDE
 - Eclipse Rich Client Platform (RCP)
 - Eclipse Modeling Framework (EMF)
 - Java 3D

First Iteration

- Plan activities and properties viewer
 - Allows viewing and manipulating of activity properties
 - Loading and saving of plans
- Interface with CLARAty code
 - Computer simulated arm movements
- 3-Dimensional rover viewing and interaction
 - Visual representation of simulation
